why do some students make the most of college while others struggle and look back on years of missed deadlines and missed opportunities what choices can students make and what can teachers and university leaders do to improve more students experiences and help them achieve the most from their time and money most important how is the increasing diversity on campus cultural racial and religious affecting education what can students and faculty do to benefit from differences and even learn from the inevitable moments of misunderstanding and awkwardness from his ten years of interviews with harvard seniors richard light distills encouraging and surprisingly practical answers to fundamental questions how can you choose classes wisely what s the best way to study why do some professors inspire and others leave you cold how can you connect what you discover in class to all you re learning in the rest of life light suggests for instance studying in pairs or groups can be more productive than studying alone the first and most important skill to learn is time management supervised independent research projects and working internships offer the most learning and the greatest challenges and encounters with students of different religions can be simultaneously the most taxing and most illuminating of all the experiences with a diverse student body filled with practical advice illuminated with stories of real students self doubts failures discoveries and hopes making the most of college is a handbook for academic and personal success

rock offers a guide to what it takes to master seventh grade math education

being just a mother is the highest calling one can have the problem is that no one believes this not the mother not the workplace and not the government

this guide features 180 pages of hands on standards driven study material on how to understand and retain seventh grade math full explanations with step by step instructions are provided worksheets for each standard are provided along with two full length 100 problem comprehensive final exams education

in a society where everyone is supposed to go to college the problems facing high school graduates who do not continue their education are often forgotten many cannot find jobs and those who do are often stuck in low wage dead end positions meanwhile employers complain that high school graduates lack the necessary skills for today's workplace beyond college for all focuses on this crisis in the american labor market around the world author james e rosenbaum finds employers view high school graduates as valuable workers why not here rosenbaum reports on new studies of the interaction between employers and high schools in the united states he concludes that each fails to communicate its needs to the other leading to a predictable array of problems for young people in the years after graduation high schools caught up in the college for all myth provide little job advice or preparation leading students to make unrealistic plans and hampering both students who do not go to college and those who start college but do not finish employers say they care about academic skills but then do not consider grades when deciding whom to hire faced with few incentives to achieve many students lapse into precisely the kinds of habits employers deplore doing as little as possible in high school and developing poor attitudes rosenbaum contrasts the situation in the united states with that of two other industrialized nations japan and germany which have formal systems for aiding young people who are looking for employment virtually all japanese high school graduates obtain work and in germany eighteen year olds routinely hold responsible jobs while the american

system lacks such formal linkages rosenbaum uncovers an encouraging hidden system that helps many high school graduates find work he shows that some american teachers particularly vocational teachers create informal networks with employers to guide students into the labor market enterprising employers have figures out how to use these networks to meet their labor needs while students themselves can take steps to increase their ability to land desirable jobs beyond college for all suggests new policies based on such practices rosenbaum presents a compelling case that the problems faced by american high school graduates and employers can be solved if young people employers and high schools build upon existing informal networks to create formal paths for students to enter the world of work a volume in the american sociological association s rose series in sociology

homework has been a central topic of study for over 80 years this study investigated 1 the opinions of a class of introductory college mathematics students on the purpose of homework in their class 2 their professor s opinion on the purpose of mathematics in the class and whether any differences between the students and the teacher s opinion had any effects on the students and 3 whether time spent on homework correlated positively with grade expectation in the class research took place over a one year period involving first year engineering students taking multi variable calculus students were given a survey asking a number of questions including what they believed to be the purpose of homework how many hours per week they spent on homework and what they expected would be their grade in the course their professor was then interviewed in email correspondence and provided her views on the purpose of homework and its relationship to learning and examinations this study found that the vast majority of students in the class viewed homework as practice and review of ideas already presented in lecture their professor also thought the purpose of homework was for practice and review but had other purposes including the application of learned material to thought provoking problems and integrating old knowledge with new knowledge as a possible effect the few students who selected higher cognitive purposes of homework such as the synthesis of new ideas not previously presented and the evaluation of one s own

understanding tended to expect higher grades than their peers lastly the correlation between grade expectation and time spent on homework was positive up until a point whereafter the correlation became negative this point coincided with the expected amount of time to spend on homework given by the professor but whether this was the cause of the change in correlation was not proven it did indicate however that the assumption that homework had a purely positive correlation with grade expectation at the collegiate level was tenuous

a dynamic educator teaches parents how to set the stage for academic success sharon chandler knows the many challenges that parents face today with no college education herself she instilled the old fashioned values of respect hard work and academic focus in her two children both of whom went on to attend prestigious graduate schools chandler now teaches hundreds of parents every year to prepare their children for college through her non profit yes2kollege education resources inc this book reveals the practical proven methods behind chandler s belief that any hard working student can attend college regardless of family background or income say yes to collegeshows parents how to lay a foundation of excellence through love of learning and respect for authority combat peer pressure and pop culture images work with teachers guidance counselors and others mind a child s emotional health and academic development pick the right college tackle the sats and college admissions process find support along the way say yes to collegepresents a winning combination of traditional tough love and hard won knowledge that will help parents empower their children for a lifetime of success

this text presents a comprehensive introduction to the topics in intermediate and college level algebra it provides students with the basic skills they ll need to succeed in their next mathematics course as the book progresses the mathematical language matures examples grow less structured and exercises grow more varied thus improving students problem solving skills
